

We Know Material Processing

EIRICH & APS: The most comprehensive line of mixers!

Eirich Machines, member of worldwide Eirich Group, is an international supplier of material processing technologies and solutions. With our two brands EIRICH and American Process Systems® (APS), we offer the most comprehensive line of mixers, blenders, dryers, reactors, and ancillary equipment. We are your one-stop shop for all material processing needs with sales, test lab, engineering, manufacturing, and customer support in one location.

We have been in the material processing business for over 160 years. Let us share our experience with you!

Material processing technologies:

- Mixing/Blending
- Granulating/Pelletizing
- Drying
- Reacting
- Coating
- Kneading
- Dispersing

Industries we serve:

- Food & Beverage
- Nutraceuticals
- Battery
- Building Material
- Ceramics
- Refractories
- Foundry
- Fertilizers
- Chemicals
- And more...

What we offer:

- In-house test lab and rental equipment
- Virtual lab tests via livestream video
- Engineering team for tailored solutions
- Production in Gurnee, IL - Made in the USA
- Customer Support team for service and parts
- Serving the USA, Canada, Mexico, and Central America
- Eirich Group: 1,300 employees in 11 countries

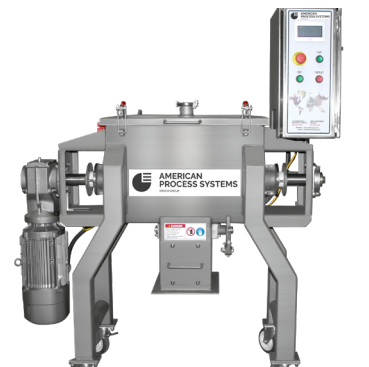

Two Brands

EIRICH

Eirich intensive mixers

- Eirich's unique mixer design is well known. The rotating pan and variable-speed tool offer flexibility and ensure homogeneous, high-quality mixes and faster process times. Plus, you can mix, granulate, coat, knead, and disperse in one unit!
- Capacity ranges from 1 liter to 12,000 liters. The scaleup capability from lab to full production is excellent.
- Eirich offers complete system engineering, including weighing, dosing, feeding, and controlling.

**AMERICAN
PROCESS SYSTEMS**

EIRICH GROUP

APS horizontal blenders

- APS sanitary blenders are known for their high quality, robustness, and long service life. The solid bar agitators and continuous welds provide extra strength and premium sanitary design.
- Our APS equipment is available as Fluidizing Paddle Blenders, Ribbon Blenders, Paddle/Ribbon Blenders, Plow Blenders, Dryers/Reactors, and ancillary components. Every blender is tailored to your specific application.
- Capacity ranges from 1.5 cubic feet to 515 cubic feet.
- EIRICH and APS equipment can be tested in our Gurnee, IL, tech center. Call us today!
