EIRICH Machines, member of worldwide EIRICH Group, is an international supplier of material processing technologies and solutions. With our two product lines, EIRICH and American Process Systems®, we offer the most comprehensive range of mixers, blenders, dryers, grinders, and peripheral equipment. We are your one-stop shop for all material processing needs with sales, test lab, engineering, production, and customer support in one location.

EIRICH was founded in 1863, we have over 150 years of experience in the material processing business. We take great pride in our continuous efforts and drive for research and innovation in an ever-changing industry.

**What we Offer:**
- In-house test lab and rental equipment
- Virtual lab tests via livestream video
- Engineering team for customized solutions
- Production in Gurnee, IL - Made in the USA
- Customer Support team for service and parts
- Serving the USA, Canada, Mexico, and Central America
- EIRICH Group: 15 locations worldwide, 7 test labs

**Material Processing Technologies:**
- Mixing/Blending
- Granulating/Pelletizing
- Drying
- Reacting
- Coating
- Kneading
- Dispersing
- Grinding

**Industries We Serve:**
- Food & Beverage
- Nutraceuticals/Pharmaceuticals
- Battery
- Fertilizers
- Building Material
- Ceramics
- Foundry
- Chemicals
- Mining
- And more...
Two Product Lines

EIRICH

• The intensive EIRICH Mixer with its unique design is well known around the world. The tilted, rotating pan and variable-speed tool ensure homogeneous, high-quality mixes and faster process times. Plus, you can mix, granulate, coat, knead, and disperse in one unit!

• The mixers’ capacity ranges from 1 liter to 12,000 liters. In other words, virtually no project is too small or too large. The scaleup capability from test lab to full production is excellent.

• EIRICH offers complete plant systems, including units for storing, transporting, weighing, metering, and controlling.

• EIRICH’s grinding technology includes mills for wet and dry grinding of brittle materials. Mining plants worldwide have significantly reduced costs and energy consumption with EIRICH mills.

American Process Systems®

• APS blenders are a staple in thousands of processing plants in North America. They are known for their high quality, robustness, and long service life. The solid bar agitators and continuous welds guarantee a sanitary design, there is no room for contamination.

• APS blending equipment is available as Fluidizing Paddle Blender, Ribbon Blender, Ribbon/Paddle Blender, Plow Blender, Dryer/Reactor, and Microwave Mixer & Dryer.

• The capacity ranges from 1.5 cubic feet (lab unit) to 515 cubic feet.

• APS also offers peripheral plant equipment, such as bag dump stations, bulk bag loading and discharge systems, filters, screens, product conditioners (for delumping), and mezzanines/platforms.
