

Repair

The Pioneer in Material Processing

Repair

It is not always absolutely necessary to replace a defective part with a new one. The Eirich in-house repair service has a wealth of expertise and uses state-of-the-art equipment. We can refurbish your original Eirich parts and make them as good as new. Because Eirich manufactures high quality parts, repair is often the more cost-effective option. The parts can be fully reconditioned and tested, and the quality is as good as the original quality of the part. We would be glad to handle the complete logistics of removing and shipping the parts.

A brief summary of our repair service:

- Repair service for genuine Eirich parts including manufacturer's quality guarantee
- Complete reconditioning of functional assemblies; the reconditioned parts are as good as new
- Generation of inspection/test log and report
- Logistics management

Advantages:

- Re-use of genuine Eirich parts reduces the cost to you
- Quality guarantee, production reliability
- The manufacturer handles the logistics process
