Two Product Lines:

EIRICH

American Process Systems®

EIRICH Machines offers a full Refurbishment Program for both our APS and EIRICH R/D Series product lines. This program ensures that your mixer/blender will operate at OEM-designed performance and maximum efficiency.

Our Capabilities

- Replacement of original parts, or upgraded parts
- Exterior or internal polishing, and exterior coatings
- In-house engineering, utilizing world-class 3D software
- In-house testing of critical components (e.g., shaft straightness and dye penetrant tests, discharge gate functionality/sealing, electrical function of motors)

Refurbishment Benefits

- Faster turnaround time from start to finish
- Installation and commissioning time minimized thanks to merely updating an original configuration
- An economical option if budget is limited

Competitors' Equipment

Talk to our Customer Support Team about our refurbishing capabilities even if you don't have an APS or EIRICH machine. We will walk you through the steps and also review how implemented changes with our technology can improve your process. For example, we can combine the tank you already have with our agitators.
